

OPERATIONAL UPDATE: SASANOF-1 EXPLORATION WELL

Western Gas provides the following update on the drilling of the Sasanof-1 exploration well, approximately 207 km northwest of Onslow, Western Australia:

- The Sasanof-1 exploration well has been drilled to a total depth of 2390 m RMDT by the Valaris MS-1 rig without incident.
- No commercial hydrocarbons were intersected.
- As planned, the well will now be plugged and permanently abandoned.
- De-mobilisation activities will then commence.

COMMENT – WESTERN GAS

“Obviously this is a disappointing result, but we can be proud of the efforts of the Western Gas extended team, including our joint venture partners and well delivery service providers.”

Will Barker, Executive Director

ABOUT WESTERN GAS

Western Gas is a Western Australian company focused on exploring and accelerating development of our strategic resource position in the heart of the North West Shelf, Australia’s premier production basin. Our strategy is focussed on adding significant value to our portfolio through high impact exploration drilling and maturing our Equus Gas Project to meet growing domestic and export gas demand.
